DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over King in view of Sandretto in further view of Ginsberg.

King discloses a method foe enabling investors to participate in market activity and preserve principal. There is offered an investment instrument for sale, for a certain face value, term and date of maturity (col 7, lines 45-50). Funds are accepted from a purchaser for at least one of the investment instrument. A return—generating model is disclosed based on the activity of at least one market index and the return earned by the investment is calculated according to the return-generating model (col 8, lines 23-65). The monetary equivalent of at least one of the principal and return are distributed to the purchaser and the return is added to the face value of the investment to calculate the principal (col 9, lines 48-67; col 10, lines 1-6). The principal is guaranteed against losses (col 15, lines 40-45).

Art Unit: 1762

King does not disclose:

allowing the purchaser to select a return-generating model from at least two deferent return-generating models.

Sandretto discloses allowing the purchaser to select a return-generating model from at least two deferent return-generating models (col 27, lines 15-20).

It would have been obvious to one with ordinary skill in the art to include allowing the purchaser to select a return-generating model from at least two deferent return-generating models because Sandretto teaches model determination will affect cash flow (col 25, lines 6-16).

It would have been obvious to one with ordinary skill in the art to include term durations as claimed since Sandretto teaches various time periods for simulation purposes to determine the best model used (col 25, lines 10-14).

Asset value determination model is encompassed within return generation considerations.

King also does not disclose basing activity of the end of at least one of said term and said date of maturity.

Ginsberg discloses basing activity of the end of at least one of said term and said date of maturity (col 10, lines 41-53).

It would have been obvious to one with ordinary skill in the art to include basing activity of the end of at least one of said term and said date of maturity because Ginsberg teaches calculations of least expensive portfolio (col 10, lines 41-45).

Response to Arguments

Applicant's arguments filed have been fully considered but they are not persuasive.

A return–generating model is disclosed to King et al based on the activity of at least one market index and the return earned by the investment is calculated according to the return-generating model (col 8, lines 23-65).

Asset value determination model is encompassed within return generation considerations for the purposes of claim interpretation.

Ginsberg discloses basing activity of the end of at least one of said term and said date of maturity (col 10, lines 41-53) is is combined for the reasons given in the office action.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Regarding all Class 705 applications, the management contact regarding examination is: Vincent Millin (SPE, art unit 3624) at 571-272-6747.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
